

## 1.2m FCC Compliant Tx/Rx Antenna System

Model Number TXFCC-120KU

### Features

- Navigator™ Style Fine Azimuth and Fine Elevation Adjustments
- Single Piece Deep Drawn Metal Reflector
- Sturdy 2" Square Boom Accommodates Many Outdoor Units, Holds up to 14 lbs. on OMT at end of boom
- AZ/EL interface to 2 7/8" or 3" Pipe
- Pre-assembled Mount
- Dual side galvanized steel powdercoated with a 10 year or 700 hrs salt spray warranty
- Includes Two port Linear Tx/Rx Feed assembly
- Backframe Pre-assembled to Reflector

### Description

Why pay more for a transmit/receive antenna? The Patriot 120A is an FCC Compliant transmit antenna. The stamping process that produces the solid metal reflector results in superior surface accuracy and repeatability. The pre-assembled steel back structure adds strength and stability to the system and keeps the installation process simple.

The Navigator Style fine tune Azimuth and Elevation cap reduces pointing errors during installation, allowing more accurate boresighting on the satellite. Increased pointing accuracy leads to greater link availability. Special packaging techniques are employed for every system shipped to protect the surface of the dish.
